DS1019 ARCHER WINDOW HANDLE

OVERVIEW

The DS1019 Archer Window Handles are designed to be the perfect compliment for modern sliding windows.

The handle provides a practical grab position to enable the easy operation of larger heavier windows. The shape best compliments a window where minimal uniform design is desired.

The handle is non handed for reduced inventory and can be keyed alike to other windows and doors.

PRODUCT FEATURES

- Die cast chrome hardened tongue provides added security.
- Polesium construction provided durability and corrosion resistance.
- Square non handed handle shape
- One key solution compatible
- Low profile dimensions
- Anti lift Engagement with striker
- All locks form part of the Doric One Key™ solution and can be keyed alike to other window locks
- Meets AWA ICP002-720 hour corrosion resistant test
